

# BoSch Data

**Factsheet**  
**comMAN**

## BoSch Data

BoSch Data GmbH is a certified Microsoft Dynamics partner, offering various solutions for Microsoft Dynamics Business Central. The applications range from individual modules/applications to large solution packages in the areas of soil, building materials, and commodities/shipping. The development was focused on good usability for users. New functions extend the scope of existing solutions or create new possibilities for the user.

## BoSch Data – comMAN App

The **comMAN** App, based on **Microsoft Dynamics™ Business Central®** was designed for using **communications and management** of different requirements. Regardless of whether a user wants to connect Business Central with Microsoft Azure™ BLOB storage, Microsoft Azure™ File Storage or even other endpoints, **comMAN** supports the communication and messaging across the systems.

Using the **comMAN**, you can

- Upload, download and delete files
  - Azure Files
  - Azure Blob Storage
  - Local SMB file server (external SMB service required)
- Use different modules to process file content
  - Export data and store as a file
  - Import a file and store the data in Business Central
