

# BoSch Data

**Factsheet  
comMAN**

## BoSch Data

**BoSch Data GmbH** is a certified Microsoft Dynamics partner providing a wide range of solutions for **Microsoft Dynamics Business Central**. Our offerings span from standalone modules and applications to comprehensive solution suites designed for the soil, construction materials, and commodities/shipping industries.

Our development approach places strong emphasis on **user-friendly design** to ensure an intuitive experience. New features continuously enhance the capabilities of existing solutions or open up entirely new possibilities for users.

## BoSch Data – comMAN App

The **comMAN App**, built on **Microsoft Dynamics™ Business Central®**, is designed to facilitate communication and manage diverse integration requirements. Whether a user needs to connect Business Central with **Microsoft Azure™ BLOB Storage**, **Microsoft Azure™ File Storage**, or other external endpoints, comMAN seamlessly supports cross-system communication and messaging.

Using the **comMAN**, you can

- Upload, download and delete files
  - Azure Files
  - Azure Blob Storage
  - Local SMB file server (external SMB service required)
- Use different modules to process file content
  - Export data and store as a file
  - Import a file and store the data in Business Central
