

BoSch Data

Factsheet **smartMAN**

BoSch Data

BoSch Data GmbH is a certified Microsoft Dynamics partner providing a broad range of solutions for **Microsoft Dynamics Business Central**. Our offerings include both standalone modules and comprehensive solution packages tailored to the soil, building materials, and commodities/shipping industries.

Our development approach places strong emphasis on **user-friendly design**, ensuring that solutions are intuitive and efficient to use. New features continuously expand the scope of existing applications or introduce entirely new capabilities, empowering users to optimize their business processes.

BoSch Data – smartMAN App

The **smartMAN App** extends **Microsoft Dynamics™ Business Central®** with a range of essential, practical core functionalities. It is designed to give users enhanced capabilities for working with Business Central, addressing real-world standard requirements that are not covered out of the box.

smartMAN helps users work more efficiently and intuitively with Business Central. Examples include ready-to-use reports compliant with **ISO DIN 5008**, transit postings for bank management, document-based intercompany data exchange, and traffic-light indicators for item availability across various modules.

With these enhancements, the smartMAN App significantly improves and expands the usability and functionality of **Microsoft Dynamics™ Business Central®**.

By using the **smartMAN App**, you gain access to a wide range of powerful functions and features.

At **smartMAN** Base App, you

- will get more than one sales/purchase person at masterdata and documents
- alternative VAT ID at vendor order addresses
- get unit of measure conversion
- setup text codes quantity based
- get info boxes for user tasks
- enhance field no. 2 in masterdata
- manage sales areas based on post codes per sales person
- setup price stability on price lists and documents
- get prices on price lists per ship-to address or location code
- ...

With the **smartMAN App**, many additional features and enhancements become available. smartMAN also extends Microsoft Dynamics™ Business Central® in several key areas, providing users with practical, productivity-focused improvements that go beyond the standard functionality.

- DIN ISO 5008 standard reports
- setup transfer accounts for payments at bank management
- manage charge items and additional items per item by value and percentage
- automatically texts per charge item and charge items per variants
- intercompany with transfer postings sales / purchase orders back and for
- advanced settings for job management
- standard masterdata import and export entries
