INTRODUCTION

The app was designed for

The **smartMAN App** extends **Microsoft Dynamics™ Business Central®** with a wide range of essential core functionalities. It provides users with additional capabilities that address real-world, everyday business requirements that are not covered in the standard system.

smartMAN helps users work more efficiently and intuitively with Business Central. Examples include ready-to-use reports compliant with **ISO DIN 5008**, transit postings within bank management, document-based data exchange for intercompany processes, and traffic-light indicators for item availability across various modules.

With these enhancements, the smartMAN App significantly improves and expands the usability and functionality of **Microsoft Dynamics™ Business Central®**, giving users far more flexibility and practical tools for their daily work.

Trainings for App Solutions

We understand that effective training is essential to help you get the most out of your investment in the **BoSch Data – smartMAN application**. Our expert-designed training programs ensure that your knowledge of the solution remains up to date and support you in developing the skills needed to fully leverage its capabilities. Whether you prefer online training, instructor-led sessions, or self-paced learning, we offer the right program to meet your needs. Simply choose the training format that best suits you.

With our comprehensive training materials, you can work through the provided manuals at any time and at your own pace. These resources include a wealth of tips, best practices, and background information that you can revisit whenever needed.

Case Scenarios

To help end users fully understand the application's functionality and its impact, the **BoSch Data – smartMAN App** provides detailed case studies and explanations within the training materials. These resources enable users to replicate their own processes and requirements in the standard demo database. They can also test the application's features directly using the provided examples.
